

3.2 台风云系中心的定义

台风云系中心的定义

- ✓ 台风（云系）中心是所有弯曲（螺旋）云带的共同曲率中心

The cloud system center is defined as the focal point of all the curved lines or bands of the cloud system. It can also be thought of as the point toward which the curved lines merge or spiral (Dvorak , (1985)).

- ✓ 台风（云系）中心通常都不明显和清楚，特别是在晚上

- **Dvorak模式台风（云系）中心**

- **Modeled Cloud Centre**

- ✓ **Dvorak给出了不同台风云型在不同发展阶段期望的台风中心位置**
